

**2009 05/26 Family Tour**

**Experience the ecological beauty of Tainan**

## **【Itinerary Feature】**

### **【Taiwan Salt Museum】**

Under the care of a group of volunteer workers, the 338 years of solar salt production history in Taiwan is now preserved in Taiwan Salt Museum at Cigu Township, Tainan County. The shape and the look of the salt piles are strategically designed so that the two piles look like two white pyramids arising high from the salt field.

### **【Black-Faced Spoonbill】**

[Every year from October to April]

Every winter, Tainan County Chigu wetlands is a popular location for bird lovers, Many migratory birds choose the Tsengwen river to spend their winters, Most commonly found is the black-faced spoonbill which is recognized by everybody. In order to let everybody enjoy seeing these special birds, three pavilions were built especially for bird-watching °
